

**Si Pro ANPR** Automatic Number Plate Recognition System

## **Si Pro ANPR** Automatic Number Plate Recognition System

Si Pro ANPR- Automatic Number Plate Recognition software is an open architecture web application that monitors vehicles entering or exiting in a premise. The fieldproven ANPR engine developed by SecureAAi is the key component of the Si Pro ANPR design, accurately detecting and capturing the vehicle number plate. Si Pro ANPR software allows monitoring of multiple gates in a single system

Si Pro ANPR software has a very intuitive GUI that allows operators to do live monitoring, event processing, viewing of evidence images and video etc... in a single window, in addition to tracking and managing vehicle registration with ease. Si Pro ANPR software easily integrates with third-party systems like boom barriers, bollards, etc. The software is designed to detect license plates of vehicles in over 100 countries.

# HIGHLIGHTS

- Highly accurate OCR engine
- Intuitive GUI
- > Vehicle Plate image and video capture and multiple overview camera feeds
- Vehicle tagging
- Live monitoring
- Configure multiple gates and Lanes
- > Integration with third party system like boom barriers, bollards, etc.
- Detailed MIS reports and statistics
- > Entry-exit and registered vehicle notifications
- > Vehicle categorisation such as employee/ visitor/ registered/ blacklisted/ hotlisted etc.

### SMART DASHBOARD AND DATA VISUALISATION PLATFORM

This is an interactive tool that provides real time statistical data, display of graphs/ charts of violations. It also gives details of violations by vehicle queue, Last hour, today vehicle and last 24 hous vehicles, along with snapshots of all the events for any given period. The browser-based design makes the solution easy to use and gives flexibility to generate reports based on customers' operational requirements. The framework is highly scalable and integrates with third-party sensors through open APIs/ SKDs. vehicle captured within the camera FOV is recognised as 'recognized', 'unrecognized, or any other category tagged by the user.

### SCHEMATIC ARCHITECTURE

The figure below shows the schematic architecture of Si Pro ANPR- Automatic Number Plate Recognition software and various components of an overall solution. a dedicated ANPR camera is used to capture the number plate of the vehicle entering or exiting the premises.

#### REPORTS

The interface allows control room operators to search and view archived events anytime. There can be various search criteria – date and time, event type, license plate number, or any combination of these parameters. The search results appear on the screen and can be exported as an Excel or PDF file.
